

PROJECTS

Information:

Step 1:

Collect data about weather and precipitation from **January to December** . You can create a table to register all the information (data)

Step 2:

Make **2 graphs**. You can take into account the example from your books (page 28)

Step 3 in class:

Compare and contrast the information.

Interpret the information and make predictions.

What type of climate does your city have?

GROUPS:

RED SYDNEY

BLUE TOKYO

PURPLE: BEIJING

ROSA NEW YORK

Table

Precipitation	January	February	March	April	May	June	July	September	November	December
Temperature	January	February	March	April	May	June	July	September	November	December
